

LIGHTWEIGHT JACKS

A LIGHTWEIGHT, DURABLE, & RAPID SOLUTION FOR MAXIMUM LIFTING CAPACITY IN ANY ENVIRONMENT

7 TON COMPACT

Lift Capacity: 7 Tons
(14,000 lbs)

Weight: 15.6 lbs

Lift Range: 8.7" to 22.375"

7 TON

Lift Capacity: 7 Tons
(14,000 lbs)

Weight: 18 lbs

Lift Range: 11.375" to 31"

8 TON

Lift Capacity: 8 Tons
(16,000 lbs)

Weight: 22 lbs

Lift Range: 11.25" to 31"

10 TON

Lift Capacity: 10 Tons
(20,000 lbs)

Weight: 22 lbs

Lift Range: 11.25" to 31"

Our lightweight jacks are optimized for maximum lifting capacity in a light, compact, quick, and easy to use package.

These jacks were developed for the most extreme military applications and are available to meet your needs.

Performance of our lightweight jacks have been validated through rigorous testing. This includes harsh environmental testing for operation in dry sandy environments and corrosion resistance tests to ensure quality operation for the life of the jacks.

WHEN PERFORMANCE MATTERS— WEIGHT COUNTS

Our proven production capabilities position us to meet high-volume production needs while maintaining high quality standards. Custom configurations can be provided to satisfy the needs of specific custom vehicle platforms.

TESTED & PROVEN

- **Tested to MIL-STD-810G**
Sand/dust testing & corrosion resistance
- **Meets DoD & ANSI standards for vehicle lifting applications**
- **Meets ASME PALD-2009**
Safety standard for portable automotive lifting devices
- **Optional lightweight lifting saddle**
